SAMUEL MERCEDES
JUNIOR BACK-END DEVELOPER

P 412-609-1130   E SAMERCEDES4@GMAIL.COM   A Linkedin.com/Samuel-mercedes   W Leumas390.github.io

OBJECTIVE
I am a highly motivated Junior Developer who recently graduated NU Bootcamp and is seeking an opportunity to pursue a highly rewarding career as a Back-end Developer. A company where I can elevate my skills and grow as a developer while adding value to the organization's growth.

EXPERIENCE
Nine1Forged Wheels (work remotely)
June 2015 – Current
Marketing Coordinator

- Handling website maintenance and customer inquiries
- Update and growing all social media outlets

Cochran Subaru
March 2021 – September 2022
Service Advisor

- Assisted in overseeing flow of drive lane. Ensured that customers received prompt, courteous and effective service
- Obtains customer history and vehicle data prior to arrival when possible.

PROJECTS
Chat Web Server
- online webchat in the browser using python and Flask. For this project I had to install two externals module. The Web framework Flask and Flask- socket IO module, which allows to work with sockets easily with flask in the backend.
- imported two external JavaScript libraries. One is jQuery which is very useful for animations and interactions in the front end and socket io which is needed to help communicate the front end to backend.

MOVIE-APP
- Created a react application where is able to look a movie preview by extracting the information from the database using the API
